IN THE CLAIMS:

Please amend the claims as follows:

1. - 19. (Canceled)

20. (Currently Amended) A method for manufacturing a surface structure formed on an aluminum wheel for an automobile, said method comprising:

- (a) coating a resin film on said aluminum wheel; and
- (b) forming a thin metal film ~~having a homogeneous composition throughout a whole thickness of said thin metal film~~ and having a color similar to chrome on said resin film, wherein said thin metal film is made from a titanium-aluminum alloy containing 20-50% by weight of titanium and 80-50% by weight of aluminum formed by any one of cathode arc ion plating and sputtering using a single sintered target containing 20%-50% by weight of titanium and 80%-50% by weight of aluminum in a vacuum atmosphere.

21. (Original) A method according to claim 20, further comprising:

- (c) coating a clear protective film on said metal film.
